

BRUTE® Insecticide for Horses is a registered ready-to-use wipe-on, containing the pyrethroid insecticide, Permethrin, in a low-irritating formulation.

The oil-based fluid has a high residual efficacy against biting and nuisance flies, Sandflies and Queensland Itch.

BRUTE® is available in an easy to use 500ml bottle and specially manufactured Hand Mitt.

BRUTE® Insecticide for horses is manufactured in Queensland and is available from your nearest produce outlet or contact Flycam Pty Ltd.

BRUTE®
Insecticide for Horses**

For powerful and convenient control of biting and nuisance flies and Queensland Itch on horses.

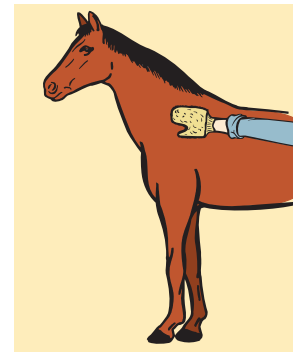

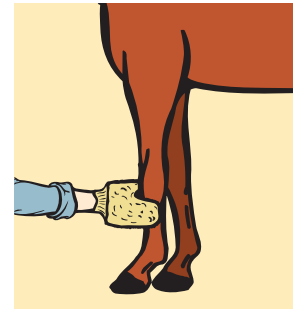

**Y-Tex®
BRUTE®**

Y-Tex® **BRUTE®** ADVANTAGES

- Easy to wipe on by hand - NO MESSY SPRAYING OR POURING.
- HAND APPLICATION means BRUTE® is more likely to be thoroughly and evenly distributed over the horse's body.
- Proven RESIDUAL CONTROL of susceptible Buffalo Fly, Stable Fly and House Fly.
- Proven RESIDUAL CONTROL of Sandflies, and causal agents of Queensland Itch.
- REGULAR USE (weekly) of BRUTE® will prevent, reduce or eliminate Queensland Itch on horses.
- RAIN RESISTANT, LOW IRRITANT formulation for long lasting effectiveness.
- DOSAGE CAN BE VARIED according to the horse size.

METHOD OF APPLICATION

- Wear the specially designed protective Mitt and rubber glove when applying.
- For the first application with a new Mitt, apply twice the dosage (60ML) to charge the Mitt.
- Pay special attention to the areas where pests congregate, including the face, being careful not to get the product in the animal's eyes.
- For Sandflies, wipe the neck, withers and around the belly.
- For Buffalo Flies, wipe the sides, shoulders and belly.
- For Stable Flies, wipe the legs, shoulders and belly.

BRUTE® Insecticide for horses is a ready-to-use formulation that provides high residual efficacy against Buffalo Flies, Stable Flies, House Flies, Sandflies and Queensland Itch.
